DUET-UC: Participant's Normal Number of Stools
Screening Data Transfer from YPrime Participant Attribute

- **Participant's normal stool number (variable)** is captured once at screening in the YPrime Portal.
- This normal stool number value is used in the calculation of the Mayo Stool Frequency Subscore.
- Janssen will discuss with internal Janssen standards team regarding mapping location to ensure that the value does not conflict with the participant's daily stool numbers from the participant diary.

You and Your Ulcerative Colitis

The following questions ask about your bowel movements in the **past 24 hours**. QSEVLINT = -PT24H

For these questions, a ***bowel movement*** is defined as any time you pass solid or liquid including stool, blood, mucus (white material), or water. Passing gas alone is not considered a bowel movement.

QSSCAT = BOWEL SIGNS AND SYMPTOMS

QSTEST

1. In the past 24 hours, how many bowel movements did you have?

- ☐ 0
- ☐ 1–2
- ☐ 3–4
- ☐ 5–6
- ☐ 7–9
- ☐ 10–12
- ☐ 13–17
- ☐ 18 or more
